Grouping of Children in Aasha Jyothi School

Mentally Retarded children are classified into 4 categories based on their Intelligence Quotient (IQ):

Mild Mental Retardation	:	IQ above 50 and below 70.
Moderate Mental Retardation	:	IQ above 34 and below 50.
Severe Mental Retardation	:	IQ above 19 and below 35.
Profound Mental Retardation	:	IQ below 20

Grouping in a special school for the mentally handicapped is done based on their chronological age (which is the actual age based on their Date of Birth) and functional level (ability). Grouping includes groups such as Pre-primary, Primary, Secondary, Prevocational, and Vocational Level.

Pre-Primary Group: This group consists of children whose chronological age is between 3-6 years, while the mental age of these children is below 4 years. The curricular areas include Personal, Social, Academic and Occupation. This group is taught Self Care skills like eating, toileting, bathing dressing, grooming etc. The focus is on improving their comprehension skills which include identifying common objects in their environment, fruits, vegetables, vehicles, following instruction, etc. They are taught to interact with people in their environment. They are taught concepts like color, size, shape, time, money etc.

Primary Group: This group has children whose chronological age is above 6 years and below 12 years. The Mental Age of the children in this group is below 8 years. There are several primary groups in the school. Based on their IQ they are divided into different Groups (Primary A, Primary B, Primary C and D). One Primary group has children who are Mildly retarded while another group has children who have Moderate Mental Retardation. Based on their functional level they are assessed and an Individualized Educational Plan is developed for each child. The

curricular areas in this group include, Self Care, Motor Skills, and Communication, Socialization, and Cognitive skills, academic, recreational and domestic skills.

Secondary Group: *The children in this group predominantly have a chronological age ranging from 11 to 14 years. The mental Age of the children here is below 8 years. The children here have either Mild, Moderate or Severe Mental retardation. The children are divided into different groups depending on their level of retardation. The focus in this area is predominantly on cognitive skills, academic skills, occupational skills, domestic skills etc. apart from the other Personal and Social skills.*

Pre-Vocational Group: *The children in this group have a Chronological age ranging from 14 to 18 years. The Mental Age of the children is below 12 years. The primary focus on training in this group is on basic work skills and domestic skills apart from academic skills, occupational skills etc.*

Vocational Group: *This includes all the children who are above 18 years. Based on their skills and their interest the children are provided vocational training in a trade of their interest. Training is provided in trades like tailoring, screen printing, book binding, phenyl making, etc. The aim of vocational training is to prepare the individual in a skill so that he can be placed in the community. This would enable him to be economically independent.*

All the groups in the school have various sections (A, B, C and D). Children are divided into different sections based on their level of retardation (Mild, Moderate, Severe).

AP Open School Section: This is a group of children who are exclusively being prepared for writing the 10th Class examinations organized by the Andhra Pradesh Open School Society.

The main objective of the society is to:

1. To provide pre-elementary Education through Open and Distance Learning (ODL) mode to School drop-outs and those missing Upper Primary stage of education and to attain Universalization of Elementary Education (UEE) in the State.
2. To provide continuing education for adult neo-literates, working men and women to reinforce their functional literacy and not to allow them to relapse into illiteracy.
